MAJOR TAKE-AWAY'S from earlier Nordic Webinars

- FAIRness can be improved by actions (step-by-step)

- FAIR DATA is NOT equal to "OPEN and FREE DATA "

- FAIR means : MACHINE ACTIONABILITY !

- Importance of COMMUNITIES / DOMAINS on choices.

- INCENTIVES can be an important driver for cultural change . . .

FOCUS on INCENTIVES

What incentives can we define and recommend that will help to drive the different policy makers and stakeholders (researchers, institutes, funders, ministries, infrastructure providers) to a faster uptake of a FAIR-based infrastructure and FAIR practices in the Nordic / Baltic countries?

TWO PARTS :

1. **Present findings of questionnaires on incentives**

2. **Virtual break-out sessions to discuss recommendations.**
